### **Oroville Dam Emergency Siren Test**

On 06/02/17 at 0825 hours the Department of Water Resources (DWR) advised the California State Warning Center (CSWC) that they conducted an Emergency Siren Test.

- Purpose of the test was to alert construction workers about a worksite emergency, should one arise.
- The test took place on 06/02/2017 at 1200 hours.
- The test lasted approximately 1 minute in duration.
- Future siren tests will take place the first Friday of each month.
- Please see attached for full announcement.

# **SITUATION SUMMARY**

## **2017 Statewide Winter Storms**

### **Cal OES Coastal Region**

#### **Paul's Slide, State Route 1, Monterey County**

Per Cal OES Coastal Duty Officer (CDO), as of 1300 hours on 05/25/17, Paul's Slide on State Route 1 has been closed to all traffic.

- Caltrans engineers report slide activity and the area has been closed in the interest of public safety.
- Assessment will commence and further details will be provided once released.
- All deliveries and local access previously scheduled have been suspended.

#### **Mud Creek Slide, State Route 1, Monterey County**

The Mud Creek area on State Route 1 sustained a major slide on the evening of 05/20/17, when over a million tons of rock and dirt fell down the slope continuing down to the ocean floor 250 feet off the shoreline.

- The Mud Creek area is ¼ mile in length, made up of five slides, four of which fell during this single incident and consolidated into one slide. The remaining slide now extends 1,500 feet in length over State Route 1 and is about 35 to 40 feet deep.
- Roadwork at Mud Creek was suspended and heavy equipment removed last week due to the threat of new slides and for safety of highway workers. Caltrans geologists and engineers plan to assess it further when this area stabilizes.
- There is no estimate when this section of State Route 1, approximately nine miles north of the San Luis Obispo/Monterey County line will re-open.

#### **Pfeiffer Bridge Incident, Monterey County**

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

# **SITUATION SUMMARY**

## **2017 Statewide Winter Storms**

### **Cal OES Inland Region**

**River Forecast – The following river is forecast to meet or exceed Flood stage:**

**Mariposa County:**

- Merced River at Pohono Bridge is forecast to exceed flood stage at 10.0 feet the morning of 06/03/17.
  - Western portion of North Pines Campground, located at the east end of Yosemite Valley between the confluence of the Merced River and Tenaya Creek, begins to flood. Water rises to the base of the swinging bridge downstream from Chapel Meadow.

**River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:**

- Placer County: Truckee River at Truckee
- Alpine County: East Fork Carson River at Markleeville, West Fork Carson River at Woodfords

**Please see link for River Forecast Guidance -** <http://www.cnrfc.noaa.gov/>

### **Cal OES Southern Region**

**River Forecast - The following river is forecast to meet or exceed Flood stage:**

**Mono County:**

- West Walker River at US 395 Below Little Walker is forecast to exceed flood stage at 6.0 feet the morning of 06/03/17.
  - Potential Impacts: Some minor flooding of lowlands, pastures, and rural roads.

### Service Interruptions:

#### **Circuit Interruption, Indio, Riverside County**

On 06/01/17 at 1941 hours, the Cal OES 9-1-1 Branch advised the California State Warning Center (CSWC) that according to Frontier, their Bermuda Dunes Central Office (CO) in Riverside County experienced a circuit disruption which affected 157 customers.

- The interruption began on 06/01/17 at 1600 hours.
- CHP Indio's Primary Rate Interface (PRI) was affected, however, 911 trunks and the Automatic Location Identifier (ALI) service was not affected. They were operational through the PSAP.

On 06/02/17 at 0955 hours, the Cal OES 9-1-1 Branch provided an update:

- Frontier reported their Bermuda Dunes CO repair was completed at 2357 hours on 06/01/17.
- Resetting a bridge rectifier restored the PRI issue.

### Remote/Community Isolations:

- None reported

# WEATHER OF CONCERN

## Weather of Concern

- No significant weather of concern to report.

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

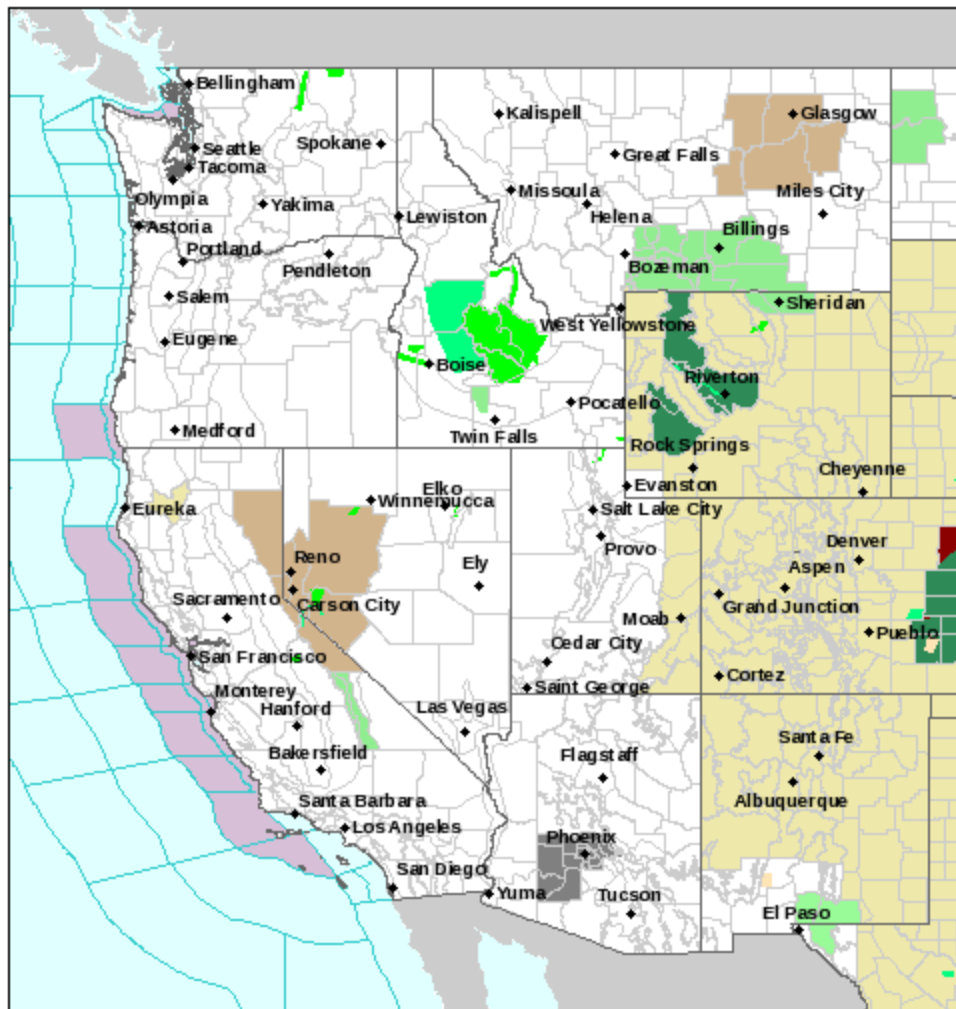

The low pressure trough associated with yesterday's weather system will be moving into the Great Basin today with westerly flow across the Pacific coming over the Northern California region right behind it. There will be some residual cloudiness behind this system today, although not so much in the SW quarter of the region. A few light showers will still be possible in the far northern areas yet this morning, but especially this afternoon. Dry, warmer weather will prevail Friday and Saturday under the mentioned westerly flow, but later Saturday and Sunday another low pressure trough will be moving ashore that could bring some more showers to areas north of a line from about Cape Mendocino to Eagle Lake. A few wet thunderstorms could be possible then as well. Early next week dry, warmer weather returns again, but later next Wednesday another low pressure trough may arrive off shore. No significant, unseasonable wind conditions are expected for the next 7 days, although there could be some fairly typical gusty westerly afternoon winds in the western areas daily. Afternoon highs will likely be notably above normal early next week with the warmest inland areas 95-97 or about 10 degrees above seasonable.

## **SOUTHERN CALIFORNIA**

A ridge of high pressure over California will bring warm and dry conditions away from the coastal areas through Saturday. Maximum temperatures will be around 10 degrees above normal, with upper 70s and 80s across the mountains and upper 80s and 90s in the valleys. Minimum humidity will be mainly between 15% and 30%, but widespread single digit humidity will occur across the deserts. Winds will be light through Saturday. The ridge will weaken as a trough moves inland across the Pacific Northwest bringing a few degrees of cooling Sunday. South to west winds of 15 to 25 mph with gusts to 40 mph will surface across the mountain ridges and desert passes Sunday afternoon and evening. The ridge will strengthen once again on Monday, which will cause a repeat of the weather that we see during the next couple of days Monday through Thursday.
